JUNE Medical

UK to Australia case study

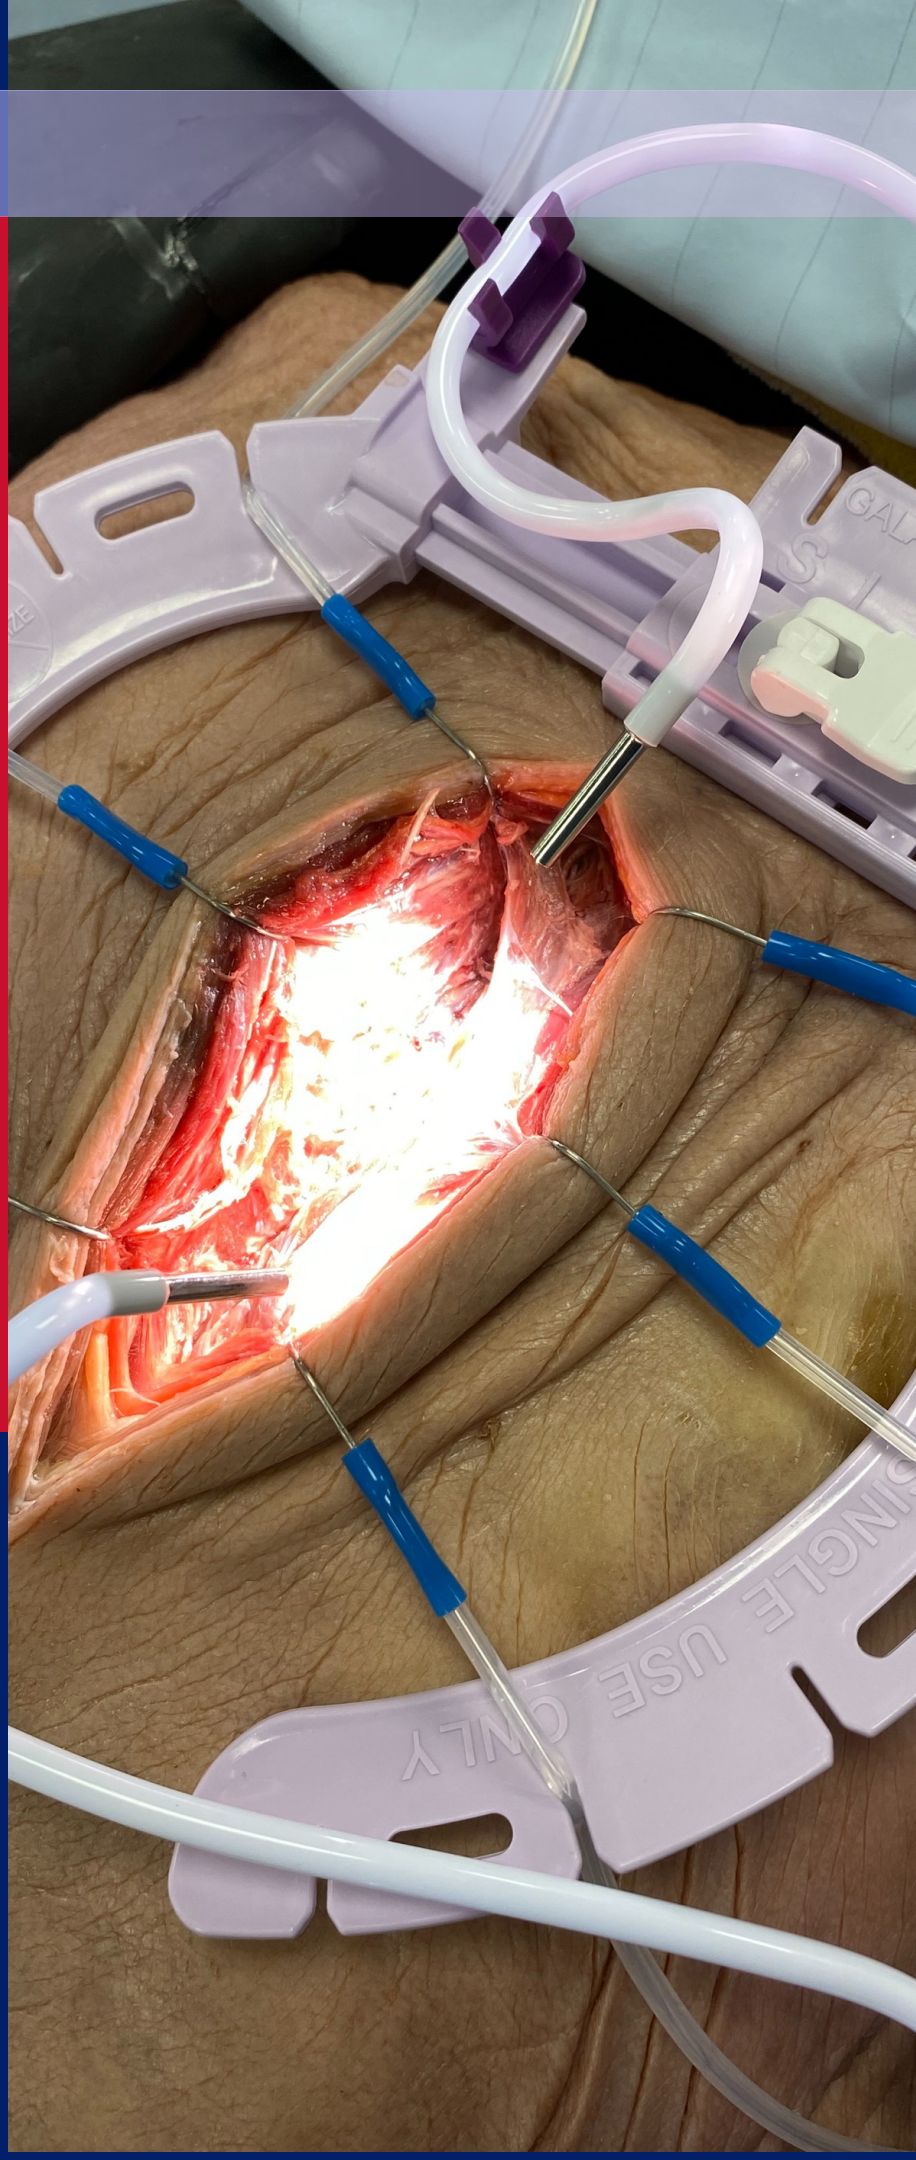
GREAT
BRITAIN & NORTHERN IRELAND

About

JUNE Medical Group is a women-owned medical devices company with offices in the UK, USA and Sweden. The company supplies selected products from leading manufacturers, and develops its own medical instruments, including the Galaxy II self-retaining retractor – an extraordinary tool featuring the world's first ever light attachment, Galaxy II™ LUX.

The Galaxy Retractor replaces an assistant and makes access to surgical sites easier, safer and cheaper.

They have won a number of awards and accoldates across the UK including Growth Champion 2019 by Department of Business and Trade.



Why Australia?

Australia is a great strategic location for UK medical device companies looking to expand, because of its significant infrastructure, its mutual recognition and shared collaboration in healthcare and and the strong reputation of British products.

How has the UK Government supported you?

During the last 6 years, the UK Government have supported JUNE Medical and the launch of the Galaxy Retractor into multiple export markets including the USA and the EU. The support and branding of being a UK Great Exporter brings instant recognition and approval in the eyes of surgeons across the world.
